EXPERIENCE

Software Engineer (Front-End Developer)

Servosity, Greenville SC — 2016-2017

- Constructed a modern front-end architecture using React, Redux, ES2015; with a build system using Webpack, Babel and other tools.
- Consumed and rendered listing-type data specific for a company profile served from a five-point REST service.
- Built custom React components for the user-facing features using Semantic UI.
- Implemented stateful and stateless components app design patterns into the design of the new web portal.
- Collaborated closely with the backend developer in the design architecture of the REST service.

Project Coordinator (EPIC Technical Dress Rehearsal Support)

Greenville Health System — 2015

- Responsible for sending daily high-level overview report of the progress of the Technical Dress Rehearsals (TDR) to upper level management and the TDR teams.
- Analyzed in-coming reports from the TDR teams to determine the qualifying status of each site (PASS or FAIL).
- Led the allocation process (hardware replacement/deployment, EPIC analyst consultation) in order to qualify a previously failed site.

Field Support Consultant — Education Technology Services

Greenville County Schools — 2015

- Served as the on-field technician for 60 schools on issues regarding schools' computers, its applications and printing needs.
- Partnered with the System and Network Engineers in creating and establishing concrete network and security policies. Part of my responsibilities involved re-imaging, configuring and deploying new users' desktops and profiles according to departments specifications.

PROFICIENCIES

- Small-Mid scale frontend architecture
- React, Redux, and ES2015
- Scalable and maintainable CSS using SASS/LESS (CSS frameworks: MaterializeCSS, Bootstrap, Semantic UI)
- Frontend build processes (Webpack, Babel etc.)
- Principles and practice of Responsive Web Design

PROJECTS

Coffee Uncrowned

(website) — Curated list of coffee shops in major cities.

Sk8 Shop (website) —

Responsive Web Design for a skate shop

Others: Pixel Perfect,

Github Recreate,

Restaurant, Clima(mobile)

EDUCATION/CERTS

The Iron Yard Academy

2016 — Front-End

Engineering coursework

with **1000+** hours of lectures and lab time

Bob Jones University

2008-2014 — Bachelor of

Science, Electronics and

Computer Technology

Amazon Certified Developer

Associate 2017 (exam

scheduled for April 2017)

CompTIA Security+ 2018

VOLUNTEERSHIP

freeCodeCamp (organizer & mentor) — weekly meetups with other campers to hack and complete curriculum.

SC Codes (mentor) — a pilot education program that provides a 12-week curated experience for adults who want to learn software development.
